

## Payment Gateway Plug-In For the Merchant

Introducing the newest addition to Comstar Interactive's impressive product line-up! The Comstar Plug-In is designed to work with QuickBooks® - a product that you already know and use everyday! The Comstar Plug-In doesn't change the current functionality of your QuickBooks product - it enhances it! Process a credit card payment directly from an invoice and the payment is automatically applied to the invoice.

Eliminate time-consuming data entry. If you have a Point of Sale terminal (Landline, Wireless, IP or WiFi) you can import the transactions from this terminal directly into your QuickBooks file. Our Plug-In also automatically creates payments from each transaction processed.

Process recurring payments quickly & easily. If you have multiple invoices to process you can filter by account, customer or date range. Once you set the filter, invoices are processed with a click of your mouse - in seconds! A status screen displays the results of each transaction.

### The Comstar Plug-In Offers these Features:

- Process Payments Directly from Invoices
- Automatically Creates Payments
- Process Recurring Payments
- Import Transactions processed via POS Terminals
- Process Returns and Voids

If you ever run into issues processing credit cards or have a question regarding a transaction, don't worry! The Plug-In is like all other terminals accessing the Comstar Gateway - you can view all transaction detail in real-time on the web.

The Comstar Plug-In eliminates time consuming steps and reduces work time so you can spend more time running your business.

# Screen Shots of the Comstar Payment Gateway Plug-In

System Requirements:  
Works with QuickBooks Pro,  
QuickBooks Premier Edition  
and QuickBooks Enterprise  
Solutions for 2005 and  
2006

The screenshot shows the QuickBooks 'Invoice' window for 'BBB COMPANY'. A menu is open, and 'Comstar Payment Gateway' is highlighted. A sub-menu is displayed with the following options: Setup, Process Sale, Process Void, Process Return, Import Transactions, Manage Locked/Pending Transactions, and About Comstar Payment Gateway. The invoice table shows one line item with a quantity of 1, item code 'monthly', and an amount of 5.66.

**Process Payments Right from an Invoice!  
This Payment is Created Automatically!**

The screenshot shows the 'Comstar Payment Gateway' processing window. It displays the following text: 'Number of invoices to process is: 6'. The list of invoices includes:  
 - Invoice number 207: Transaction could not be processed: DECLINE  
 - Invoice number 320: Successfully created transaction on web, approval code 102060. Successfully created payment in QuickBooks.  
 - Invoice number 321: Successfully created transaction on web, approval code 102060. Successfully created payment in QuickBooks.  
 - Invoice number 314: Transaction could not be processed: DECLINE  
 - Invoice number 322: Successfully created transaction on web, approval code 102060. Successfully created payment in QuickBooks.  
 - Invoice number 319: (partially visible)  
 The window also shows a progress bar, 'Started at: 11:28:34', 'Estimated time left: 00:00:07', and 'Elapsed time: 00:00:35'. Buttons for 'Print', 'Close', and 'Process New Sale' are visible at the bottom.

**Process Recurring Payments!**
